慈溪泾溢净水设备有限公司
CIXI JINGYI WATER FILTER EQUIPMENT CO., LTD.

www.jingyiwater.net

INTRODUCTION

CIXI JINGYI WATER FILTER EQUIPMENT CO., LTD. Is a professional manufacturer of water filter equipment accessories for family and office use. The main products line is international standard filter cartridge, filter housing, goose faucet, single or double water filter system, assemble filter system and various connectors accessories.

Since the year of 1996, JINGYI adopted latest advanced technology, introducing foreign advanced extrusion and roast facility. Using high quality water purifying activated carbon material with the special arts to manufacture the carbon block filter cartridge, it has fine filter device, average density, big surface area and long service life. JINGYI also has developed super micro filter cartridge within several years research. It's not only meeting the function of common filter cartridge which can remove the color and odor in water. But also can reduce the chlorine and other contamination, the micron can get to 0.1 or more. The quality is leading the head list. Meantime JINGYI has dig a series of new type housings, they have different size and aspects, they have 5" 7" 10" 20" with 1/4" 1/2" 3/4" 1" connector sizes. The products are made in accordance with the international standard. The goods also can match with the reverse osmosis water purifier equipment and water filter for family used.

Regarding stable production and serious management as objective of JINGYI, JINGYI passed the ISO9001 certificate of international quality system in 2001, at the same time JINGYI also got the testing report in institute of environmental health monitoring Chinese academy of preventive medicine with satisfying quality.

JINGYI has being exported filters and accessories Europe, America, Middle east, Russia Southeast Asia and Taiwan, etc. JINGYI has the good reputation and feedback from our clients. Our aim is to supply better quality, competitive price, best service to all clients.

Welcome you to visit our company!

BLACK FLUSH PIPING FILTER 反冲洗管道精密过滤器

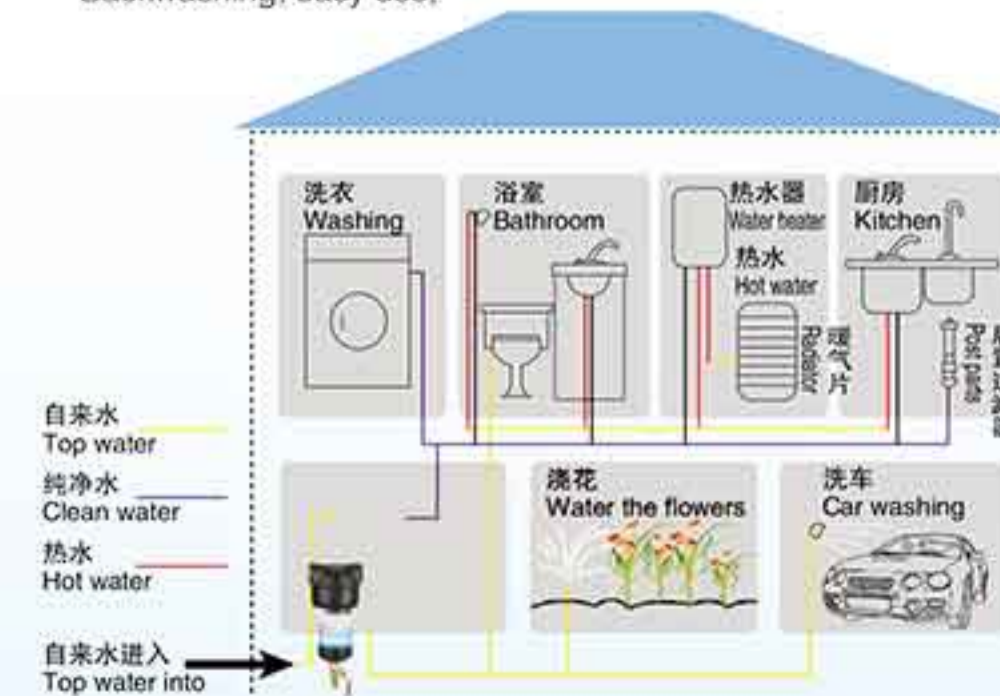

- 只需要安装一个小小的反冲洗前置过滤器，
Only need to install a small backwashing pipe filter,
- 我们完全可以改变全家生活用水状况！
can we completely change the situation of domestic water!
- 剩下的清洁工作将由它帮我们出色地完成！
It will help us to do the rest of cleaning excellently!

设计出水速率 Design of water rate	1000L/H
进水口 Inlet	G 1/2
净水出口 Pure water Outlet	G 1/2
排污口 Limber hole	G 1/2
过滤精度 Filtration precision	80UM
额定温度 Rated temperature	小于45度 less than forty-five degree

C 健康生活新净界 CLEANING FOR NEW LIFE

- 过滤铁锈、泥沙等；
Filter rust, sediment, etc;
- 环保滤芯，循环使用；
Environmental protection filter cartridges, recycle use;
- 反向冲洗，简单易行；
Backwashing, easy use;
- 食品级阻垢剂(选配)，有效阻止及清除水垢。
Food-grade detergents (optional), effectively prevent and remove scale.

自来水在自身压力驱动下透过膜孔，自来水中的铁锈、泥沙、红虫等杂质被膜孔截留。
Tap water in their own pressure drive through the film hole, such as the rust, sediment and red worm will be intercepted by the film hole.

打开阀门：被不锈钢膜所截留的杂质被水冲走，实现了滤芯的自动反冲洗。
Open the valve, the stainless steel retinal interception by impurities were swept away, realize the filter automatic reverse wash.

DESIGN TECHNOLOGY DESCRIPTION

设计工艺说明

第一级：高品质精密 PP 棉

选用顶级纯棉材质及 5 微米孔径过滤技术，具有流量大，耐腐蚀，纳污量大等效果，彻底去除水中产流的泥沙，铁锈，沉淀物，悬浮物，寄生虫等各种介质。

The first stage: the high quantity precision PP cotton it takes 5 micron, which is large water flow, corrosion resistant and high dirt holding capacity, it can completely remove residual silt, rust, deposit, suspend solids parasite and some other medium.

第二级：椰壳活性炭

精选热带雨林椰壳经特殊工艺处理制成，内部具有丰富发达的纳米微孔对水中异色异味及余氯等介质进行深度吸附，有效改善水质甘甜清醇口感。

The second stage: coconut shell activated carbon is made of selected tropical rainforest coconut shell by special process, its rich and developed nanometer pore can deep adsorption discoloration, odor, residual chlorine and other medium.

第三级：精选 60-115 目铜锌生成的 KDF

KDF 具有极强吸附性和氧化还原反应，高效去除水中可溶性重金属离子及水中的余氯，同时具有较强的抑菌性能。

The third stage: KDF which is made from 60-115 selected mesh copper zinc is strong absorption and oxidation reduction, it can effective remove solubility heavy metal ion and residual chlorine in water with strong antibacterial properties.

第四级：中空纤维超滤膜

精选超微高分子材料制成微孔 100 纳米不对称外压半透膜，四组立体设计有效对液体分离筛选，彻底去除水中有害物质及细菌病毒，保留水中矿物质。

The fourth stage: the hollow fiber ultra filtration membrane select super microcellular polymer material to made micro pore 100 nanometer unsymmetrical external pressure semi permeable membrane, 4 group of three-dimensional design can effective of liquid isolation and screening, which can reserve mineral substances while remove harmful substance and bacterial virus in water.

DOMESTIC WATER FILTER 家用净水器

WF系列多级净水器由AS和PP材料制成，能够接受目前市场所能取得的大多数标准10"滤芯，它适合于任何一种常规的滤芯，净水器上的塑料转换器或金属转换器能与水龙头直接安装，它容易安装与操作。

WF series multi-stage water filter is made of AS and PP. This water filter can use almost all 10" standard filter cartridge available on current market. It comes with a plastic adaptor or metal adaptor, which can be installed to the faucet directly. It is easy to install and operate.

REVERSE OSMOSIS SYSTEM RO反渗透机

||| JY-RO50

- 名称：标准5级RO系统
Standard 5-stage RO system
- 纯水产水量：50加仑每天
Capacity: RO water output: 50GPD
- 反冲洗类型：手动反冲洗
Flush Type: Manual Flush
- 单机包装尺寸：42x35x58厘米
Unit packing Dimension: 42x35x58cm
- 过滤级：
Filtration Stages:
1st PP-10"
2nd CTO-10"
3rd GAC-10"
4th CSM or FCS or FILMTEC
5th T-33
